The Supreme Court of Texas Denies Avery's Motion for Rehearing:

The Supreme Court of Texas thereby affirms the Fourth Court of Appeals finding that the people of Texas have authority to, voluntarily or otherwise, surrender their property and take the property of others for the creation and support of the state they create to protect their property and make themselves and their neighbors slaves and serfs forever renting their property from the state. The Fourth Court found that in direct opposition to the expert unchallenged testimony of the four major founders of America on file in this case.

The Texas Supreme Court also affirms the Fourth Court of Appeals finding that ad valorem property taxes are part of the applicable common law of Texas and the United States of America in absolute direct opposition to superior unchallenged expert testimony of four major founders of America on record in this case.

This ruling comes after the Texas Legislature failed to return the property of the people back to them in the First Special Session of 2017 ending Tuesday 8/15/17. Therefore, as of Friday 9/1/17 both the Texas Legislature and Judiciary have failed to stop civil tyranny in Texas and to restore lawful government and return the property of Texas to the people of Texas maintaining the false un-American concept that the state is the owner of property and the people are merely tenants and serfs upon the land who rent it eternally from the state.

But as of one week ago on Friday 8/25/17 God weighed in on the issue took out 200,000 state homes that can no longer be rented to the people and destroyed a total estimate of $160 billion worth of state property. Now who owns the property? God owns the property and gives it to people for their sustenance and security and the people make government to protect their property not confiscate it and rent it back to them forever.

Stop unlawful un-American tyrannical government from stealing the property and renting to the real owners.

Sincerely,

Ronald F. Avery
